The imported Beigium pigeons when purchased bring a high price. The birds bred from this strain sell for about one-half the original price per pair. It is the nature of the female bird to lay two eggs and after 17 days they hatch. The male bird does his part of the work in hatching the young, generally sitting on the nest in the day time from 16 in the morning until about 4 o'clock in the afternoon, then the mother bird takes to the nest and sits through the night hours. When the young are first hatched, the parent birds feed them with pigeon milk for about four days, then by degrees they are fed more solld food until they are waned, about six weeks later.

STOMACH UPSET?

Get at the Real Cause - Take Dr. Edwards' Olive Tablets

That's what thousands of stomach fferers are doing now. Instead of taking tonics, or trying to patch up a poor digestion, they are attacking the real cause of the ailment—clogged liver and disordered bowels.

Dr. Edwards' Olive Tablets arouse the liver in a soothing, healing way. When the liver and bowels are performing their natural functions, away goes indigestion and stomach troubles. Have you a bad taste, coated tongue, poor appetite, a lazy, don't-care feeling, no ambition or energy, trouble with undigested foods? Take Olive Tablets the substitute for calomel.

Dr. Edwards' Olive Tablets are a purely vegetable compound mixed with olive oil. You will know them by their olive color. They do the work without griping, cramps or pain.
